

# Python 代码片段

The following Python code adds two numbers and display the result using `print()` function:

---

```
1 # 赋值 assignment
2 num1 = 1.5
3 num2 = 6.3
4
5 # 两数相加 plus
6 sum = num1 + num2
7
8 # 显示结果 display the result
9 print('The sum of {0} and {1} is {2}'.format(num1, num2, sum))
```

---
